Giant Inflatables

GoFloats® Giant Inflatables are industry leaders in design and construction. The floats are built using 0.30mm to 0.40mm vinyl so they can easily hold 2 people in a raucous pool environment, compared to budget brands that use thin 0.25mm vinyl that pops at the first sound of fun. Their huge size is guaranteed to turn heads and they are equally suited for lounging or roughhousing. All rafts feature the GoFloats® Rapid Valve® System which allows for 10x faster inflation and deflation than traditional valves. They also have grommets so you can tether to other rafts or to a fixed point, which is an often-utilized feature. All floats are individually retail boxed with modern, inviting packaging.

Snow Tubes

GoFloats® Snow Tubes were inspired by the fun designs of our pool floats. Our designers took our most popular floats and bundled them up for fun in the snow! Our snow tubes utilized 0.60mm cold weather vinyl that is 2x thicker than the leading competition. After all, we designed these to be enjoyed on the slopes, not just looked at. Each tube has a 'seat' to keep your bum off the ice and 2 handles to keep you on as you fly down the mountain.
